

BOA (Berkeley Online Advising)

As an platform for academic advising, BOA:

- Promotes student success by providing advisors with real-time academic data
- Supports advisors with enhanced transactional workflows that save time and support scale
- Offers advisors new access to campus data, including reports and visualizations

For more information:

<https://dls.berkeley.edu/services/boa> (service page)

As an information technology project, BOA:

- Unifies and synthesizes data from multiple campus sources in new and strategic ways
- Is highly flexible, allowing rapid expansion or modification of services and technologies
- Offers a next-generation data integration and analytics environment to the broader campus
