

Northwest ISD Improves Digital Access for 25,000 Students

Northwest Independent School District used ClassLink to quickly shift 25,000 students to remote learning while avoiding the login and access issues that could have disrupted education.

- Students and staff accessed all their digital resources in one place, using just one password and username.
- Automated rostering ensured students had timely access to digital tools and saved time for systems engineers.

“I can't imagine, with the amount of money that we spend these days on all of our digital tools, not having ClassLink to help us get them in the hands of students in a timely manner.”

Cara Carter, Executive Director of Technology
