

TrustEd AppsTM Management Suite

Take Control of Your Edtech Ecosystem

Save Time, Money, and Frustration

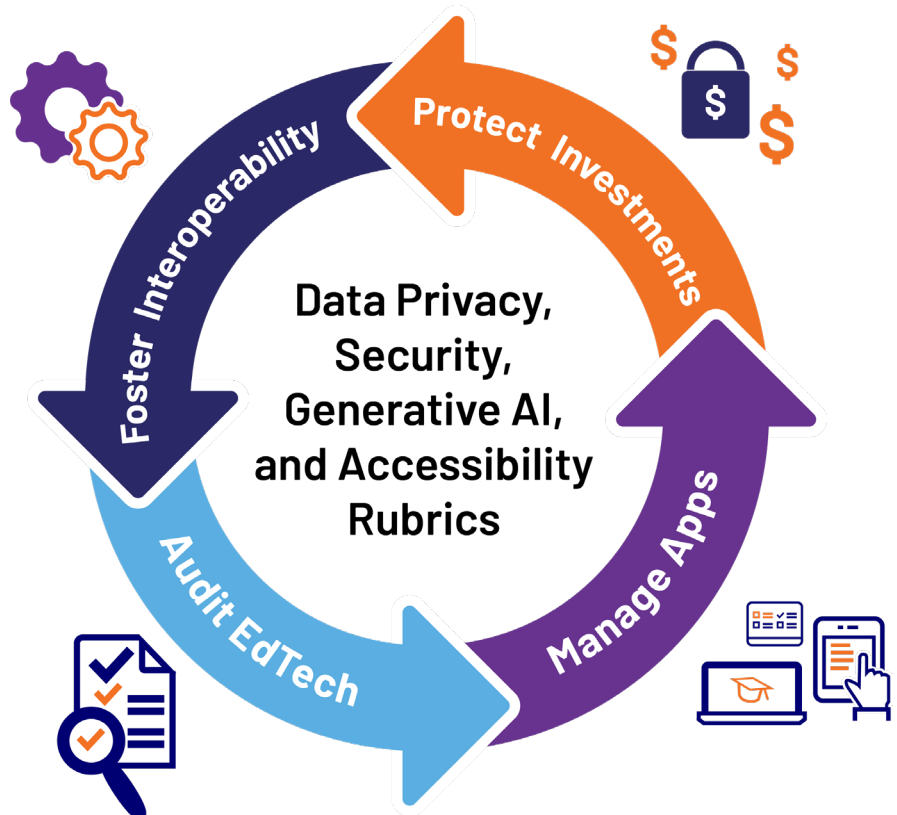

- ✓ **Improve data-driven decision-making and reduce fragmentation** by curating institutionally relevant data on each application in your ecosystem in one place.
- ✓ **Manage a robust edtech portfolio** seamlessly, without developing patterns of siloed data and maintaining homegrown solutions.
- ✓ **Review and identify trusted third party apps** and provide a curated dashboard for your faculty and staff, guiding them with data to choose apps to use.
- ✓ **Reduce procurement complexities** with the ability to view and request providers' adherence to data privacy, security, Generative AI and accessibility practices.
- ✓ **Future-proof your edtech ecosystem and remove tech lock-in** by prioritizing apps that are certified in 1EdTech interoperability standards.

Manage Your Digital Learning Ecosystem

1EdTech's TrustEd Apps Management Suite (TAMS) is a platform that enables easy curation of the edtech applications within your digital learning ecosystem along with the information and documentation you require all in one place. This allows you to prioritize edtech providers that enable you to build and maintain a connected, interoperable, and safe learning experience.

With TAMS, you can categorize and rate your applications, identify duplicative products and licenses, vet applications for adherence to standards, share these reviews with your institutional stakeholders and peer institutions, and reduce your costs and resources.

Watch a Demo!
