

# User Guide for BUILD.1EDTECH.ORG

## Introduction

As a 1EdTech member, you have access to [build.1edtech.org](https://build.1edtech.org), which provides developers with a single point of entry to the numerous 1EdTech resources available to them as part of their membership.

The screenshot displays the build.1edtech.org website interface. On the left is a vertical navigation menu with icons and labels for Home, Products, Standards, Tests, and Support. The main content area features the 1EdTech logo and the slogan "TOGETHER WE BUILD EDUCATION TECHNOLOGY". Below this is a sub-header: "Centralized access to specs, certification, and product management for all 1EdTech standards and tools." A prominent blue button labeled "Explore Developer Resources" is centered. A search bar with the placeholder text "Search specs, guides, or tools..." is positioned below the button. The main content area is organized into a grid of resource cards. The first row includes "Certification & Testing" (Access certification tools, validators, and test infrastructure), "Product Management" (Manage your products, certifications, and trusted app settings), and "Browse Standards" (Explore all 1EdTech standards and their documentation). The second row includes "Libraries & Code" (Find SDKs, reference implementations, and code samples), "Training & Guides" (Bootcamps, videos, and implementation guides for all levels), and "Compliance & Privacy" (Access rubrics, UniformID, and controls for sharing data and privacy compliance). Each card has a "Go" button and a "Coming Soon" badge. The bottom section, titled "Featured Resources", includes "1EdTech Communities" (Connect with working groups, join active standards development, and collaborate with peers on communities.1edtech.org), "1EdTech Slack Community" (Join our Slack workspace to network, ask questions, and stay up-to-date with the latest 1EdTech activities), and "1EdTech on GitHub" (Explore our open-source tools, SDKs, and reference implementations on GitHub).

# Member Resources

Certain resources are available only to members of 1EdTech. You will be prompted to log in using your 1EdTech account when you access those resources.

*Note: If you do not have a 1EdTech account yet, choose [Sign up](#) at the bottom of the login screen to create your account using your company email address. Access may not be finalized until a 1EdTech staff member validates your account.*

# Product Portfolio

Your development journey begins with accessing your list of products via the Products link in the navigation bar or the Product Management resource card. Your products, which have previously been certified or vetted, are automatically synced from the 1EdTech TrustEd Apps Catalog. You can also create new products that are beginning their diagnostics and certification journey.

When hovering over a Product, a pencil icon will appear in the top right-hand corner. Selecting this icon will take you to the Edit Product page.

On the Edit Product page, you can modify the Name, Logo, Description, and Market for your product.

You will also see the [1EdTech Uniform ID](#) for this product. This ID is automatically generated for your product when it is created. You can also add any other Decentralized Identifiers (DIDs) that belong to this product by clicking the +Add button.

1EdTech Uniform IDs allow us to share information on your product, such as Product Description, Vendor Details, and Certifications. By default, the sharing of this information is turned off. If you would like to have this information available via your 1EdTech Uniform ID, check the appropriate boxes.

Once you have completed updating your product information, click the Update button. Note that only Products that have gone through our certification process will be published on the [Trusted App Directory](#).

A screenshot of the 'EDIT PRODUCT' form. The form has a title 'EDIT PRODUCT' and a subtitle 'Update your product details and market information below.' There is a trash icon in the top right corner. The form is divided into several sections: 1. 'Name': A text input field containing 'LTI Tool' with a red asterisk indicating a required field. 2. 'Description': A rich text editor with a toolbar and a placeholder 'Product Description'. 3. 'Market': Three radio button options: 'K-12', 'Higher Education', and 'Post-Secondary Education'. 4. 'Uniform ID': A section with a title 'Uniform ID' and a value 'did:web:did-dev.1ed.tech:trusted\_app:pw3va5j3'. 5. 'Also Known As': A section with a title 'Also Known As' and a '+ Add' button. Below it, it says 'No alternative DIDs added'. 6. 'What would you like to make discoverable?': A section with a title and a subtitle 'Control which product details are discoverable in public directories. Turning on 'Share Product Information' will enable all options below.' It contains a 'Share Product Information' checkbox and three sub-options: 'Product Description', 'Vendor Details', and 'Certifications', each with a radio button. At the bottom of the form, there are three buttons: 'Cancel', 'Reset', and 'Update'.

If this Product already exists on our Product Directory, you will see the following message and be unable to change the name, logo, Description, or Market for this Product here. To make changes to your Product, you will need to click on the Manage in Product Directory button.

**i** This product is published in the Product Directory. Editing is restricted.

Please click this button to open the tool to manage this product.

[Manage in Product Directory](#)

By clicking on a Product card, you can see the product's existing certification history as well as all previously run diagnostic tests. To start a new diagnostic test or certification, click on the Start Testing button. For new products, you will need to add a version to initiate testing.

### Best Learning Platform

by Demo Supplier

UniformID: did:web:did-dev:1ed:tech:trusted\_app:fga28fjn

Best Learning Platform supports personalized, project-based, and mastery-based learning in online and blended environments.

## Start Testing

When you start testing, you will be able to choose from the initial set of certification suites that have been brought into the [BUILD.1EDTECH.ORG](https://build.1edtech.org) framework. Over time, all diagnostics and certification suites, including member validators, will be brought into this framework.

## Support

If you encounter issues, please submit a ticket to [support@1edtech.org](mailto:support@1edtech.org).
